

CUTTING (Ø>230mm)

TYPE 41

CHOPCUT FLAT DISCS FOR LIGHT BENCH GRINDERS

CHOPCUT cutting discs for light stationary machines allow to cut steel sections bars, tubes and also full sections with diameter up to 30/40 mm. They combine a long durability with an excellent cutting capacity thanks to their low thickness. Particular care is taken in the balancing of these discs to ensure comfortable cutting operations and a good grinder stability without production of vibrations.

MATERIAL	DIMENSIONS (diam - thick - bore) mm	HARDNESS	USE SPEED	ARTICLE CODE		PLUS LINE 
 STEEL	A 30-36 S (CHOPCUT): for iron and steel. Universal cutting discs, long durability and high cutting rate. Suitable for cutting steel sections bars and medium sized full sections.					DISC DURABILITY  CUTTING SPEED  CLEAN CUT
