Multi-materials

Multi-materials drill bit cylindrical shank

The sharpened carbide tip enable to drill very hard materials such as high-strength steels (locks, safes), hollow bricks and composite materials. Do not use percussion mode for drilling.

- VERSATILITY
- SPECIAL LOCKSMITH

Features

- Positive carbide tip with centering point.
- Angle tip 118°.
- 4 sided sharpening.

Benefits

- Versatility of use.
- Clean cut.
- Fast penetration.

Applications

- Drilling of composite materials.
- Safe drilling.

AdvicesConseils

- Do not use the percussion mode.

Low density wood, Alloy steel, Ceramic tile, Slate, Composite, Brick

Shank

Use

Cylindrical

Without percussion

Non polished finish

Quality plastic pouch
