Product features

- Fork seal driver tool is specially designed for dust seal installation on the suspension forks. The drivers are designed to use the forks bushing as a guide, eliminating crooked seal installation, and ensuring perfect fit of the seal. The tool is made from reinforced plastic and does not damage the seal or the fork housing during the installation. Available in different sizes, each of them corresponding to specific stanchion diameter, and is compatible with both flangeless and flanged seals, making them compatible with most modern forks.
- Better compatibility is the biggest virtue of the newest version of this tool, but it also has laser engraved logos & spec, which will stay clearly visible for extended period of time.
